DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C.

121:

I. Claims 1-8, drawn to a composition, classified in class 528, subclass 10+.

II. Claims 9-13, drawn to a method of coating, classified in class 427, subclass 387.

III. Claims 14-15, drawn to a method of preparing a composition, classified in class 528, subclass 480+.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions of Group I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the

Art Unit: 1712

instant case, the composition can be used in a materially different process, such as being extruded into a freestanding sheet.

3. Inventions of Group III and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the process can be used to make any product derived from hydrolysable silanes, however, without silanes of formula (II).

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

5. During a telephone conversation with S. Matthew Cairns on August 31, 2004 a provisional election was made WITH traverse to prosecute the invention of Group I, claims 1-8. Affirmation of this election must be made by applicant in replying to this Office action. Claims 9-15 are withdrawn from further

Art Unit: 1712

consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Claim Objections

7. Claims 1-8 are objected to because of the following informalities:

In Claims 1 (lines 9-10) and 5 (lines 9-10), should “aryl or substituted aryl” be -- arylene or substituted arylene --?

In Claims 3 and 7, should “ $M^n(OR^{11})_n$ ” be -- $M(OR^{11})_n$ --?

In Claims 3 (line 2) and 7 (line 2), should “silanes” be -- compounds -- because M is not necessarily a Si?

Appropriate correction is required.

Claim Rejections - 35 USC § 112

8. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

9. Claims 1-8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In Claims 1 (line 8) and 5 (line 8), “(C₁-C₁₀)alkyl” causes confusion because R³ is a divalent radical.

Claim Rejections - 35 USC § 102

10. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

11. Claims 1-8 are rejected under 35 U.S.C. 102(b) as being anticipated by Sugiura (JP 2001-172565).

Art Unit: 1712

Sugiura discloses a composition comprising an organic polysilica partial condensate of (A-1) silanes of formula (1) and (A-2) silanes of formula (2). ([0008]-[0014] and Examples) The weight average molecular weight of the organic polysilica partial condensate is described in [0018]. Silanes of formula (3) can be added. ([0012]). The English translation has been requested by Examiner. It should be available to Applicants later upon request.
